(a)
tuned buffer better
cost-aware better
fixed late cost per late task
λ = 0.5
λ = 1
λ = 2
late cost proportional to task reward
λ = 0.5
λ = 1
λ = 2
-2
0
2
cost-aware fallback - tuned proportional buffer (pp)
fixed-cost rule
proportional rule
interval includes 0
(b)
difference (pp)
0
1
2
3
4
5
6
7
8
Gaussian (control)
Student-t errors
rare long delays
speed bias per UAV
Pareto latency
first method better
LTCC, nominal fallback - nominal model, utility
LTCC, cost-aware - nominal fallback, score at λ = 1
